

Gigaclear bringing Superfast Broadband to Rural Areas in Braintree, Chelmsford and Colchester

The Superfast Essex programme is writing with news about its Phase 3 - Lot 2 fibre broadband rollout with network operator Gigaclear in the Central North area of Essex (including parts of Braintree District, Chelmsford City and Colchester Borough) which is going to bring superfast broadband to more than 3,700 homes and businesses - including in your community.

You may have started to see Gigaclear carrying out site surveys in your area already. Physical work to begin installing the new fibre cable network is due to start happening in parts of the Central North area in June 2018.

Note: **Hulls Lane will form part of the road diversion very shortly**

Check your area at: - <https://www.gigaclear.com/postcode-checker/superfastessex>

Road Closures may commence 4th June

The first half of the Central North rollout includes cabinet areas: **Cornish Hall End, Great Saling, Ridgewell, Panfield, Great Notley and Bocking West**

In addition, Gigaclear is planning an event for parish/town council representatives and Broadband Champions from the communities due to be covered by the Superfast Essex Phase 3 - Lot 2 (Central North) rollout. The event will give everyone the opportunity to hear more from Gigaclear about the planned work and ask any questions they may have.
